UEFI Open Source Community: tianocore.org update

UEFI US Fall Plugfest – September 20-22, 2016
Presented by Brian Richardson (Intel) and
Leif Lindholm (Linaro)

Agenda

- Introduction
- Recent changes
- Plans for the future
- Summary / Q&A

UEFI Open Source Community: tianocore.org update

Introduction

tianocore

Community supporting EDK II, an open source implementation of UEFI

Mission

- Improve contribution
- Increase code quality
- Provide regular updates and more end-to-end solutions

Vision

- A more active EDK II developer community
- A transparent decision making process based on community feedback

UEFI Open Source Community: tianocore.org update

Recent changes

Recent changes

- Governance
- Transition to github
- Staging branch workflow
- UEFI FAT license
- LLVM/Clang & GCC
- Bugzilla

Governance

- Tianocore Stewards
 - Andrew Fish – Apple
 - Leif Lindholm – Linaro
 - Michael Kinney – Intel
- Tianocore governance updated, licensing and distribution remains unchanged
- Broader input to grow the community

Transition to github

- Moved from SVN to github in Jan 2016
 - <https://github.com/tianocore/>
- Multiple repositories in use for EDK II, tools, non-OSI code, and new features
- Documentation will also transition to github (wiki & gitbooks)

Staging branch workflow

- Staging branches help keep the main edk2 branch focused on quality code
- Process details ...
<https://github.com/tianocore/edk2-staging>
 - Announce new branch via e-mail
 - Create an edk2-staging branch
 - Branch maintainers sync to edk2/master
 - Use edk2 review process to submit edk2-staging branch to edk2/master

UEFI FAT license

- As of March 2016, Microsoft removed the use clause from UEFI FAT sources
 - Very big deal for Linux distros & Ovmf/Aavmf
 - Increases UEFI adoption in virtual machines, which primarily shipped SeaBIOS
- Now covered under 2-clause BSD with no field of use restriction

<https://github.com/tianocore/edk2/tree/master/FatPkg>

<https://github.com/tianocore/edk2/tree/master/FatBinPkg>

LLVM/Clang & GCC

- EDK II now enables link time optimization (LTO) for LLVM Clang 3.8 & GCC 5.3
 - Good example of community collaboration
- Enables a platform for code analysis tools
 - Example: <http://clang-analyzer.llvm.org/>
- Validated on Linux

Binary Sizes vs VS2015

	Release Mode	GCC5	CLANG38
EDK II OVMF x64	PEIFV	26%	-15%
	DXEJV	4%	-4%
	FvMainCompact	2%	0%
	Release Mode	GCC5	CLANG38
Intel® Galileo IA32	FVRECOVERY	5%	6%
	FVMAIN	5%	16%
	FvMainCompact	9%	15%

Bugzilla

- bugzilla.tianocore.org
 - EDK II/platform issues & feature requests
- Security issues follow a special process
<https://github.com/tianocore/tianocore.github.io/wiki/Reporting-Security-Issues>
 - Never use e-mail to discuss a security issue
 - Report issues under the “Tianocore Security Issues” product in Bugzilla
 - *Never use e-mail to discuss a security issue*

UEFI Open Source Community: tianocore.org update

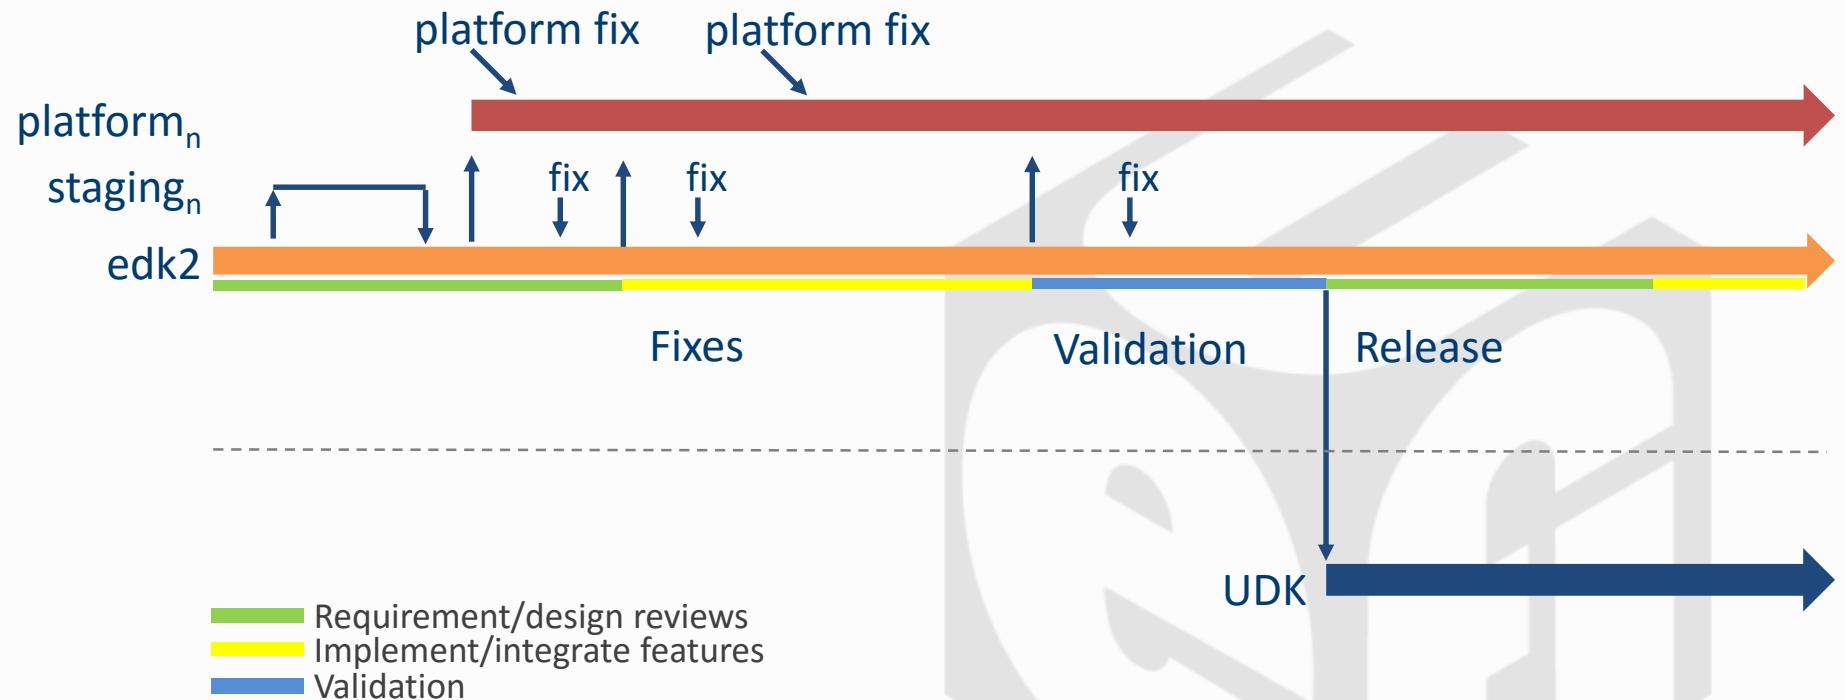

Plans for the future

Plans for the future

- Improve website content & organization
- Add test framework & test cases for edk2
- Release management
 - Goal is to have labeled releases on a regular cadence (2-4 per year)
 - Features and cadence planned using community input

Release management

UDK2017 Feature Highlights

UEFI 2.6 Features

- eMMC/SD Stack
- MemoryAttributesTable
- IPv6 Http Boot
- RamDisk
- URI Configuration

UEFI PI 1.4a Errata

Coming in Q1 2017

EDK II Implementation

- OpenSSL 1.0.2h
- Transition to NASM
- CPU MP initialization library
- Drivers
 - PiSmmCpuDxeSmm
 - SataController (generic)
 - PciHostBridgeDxe (generic)
 - LoadFileOnFv2
 - PciSioSerialDxe/SerialDxe

Plans for the future (cont.)

- Open platforms
 - More example code for new developers
 - Implemented similarities as core libraries
 - Enable centralized validation
 - Provide greater visibility for impact of changes to core code
 - Details being discussed on edk2-devel (or grab the EDK II stewards for a focus session)

Summary

- TianoCore supports open source UEFI development using EDK II
- Recent improvements include a move to github and compiler optimizations
- Future improvements will improve code quality and open platform availability

Thanks for attending the
UEFI US Fall Plugfest 2016
